

NEW ALBANY MIDDLE SCHOOL (Public School)

STUDENTS: 509 FACULTY/TEACHERS: 38 GRADE LEVELS: 6-8

PREPARING ALL FOR SUCCESS

VISION

Preparing ALL for Success is the vision for our district. Throughout our Apple Journey, we have used our district's vision and goals to drive all of our school's decisions.

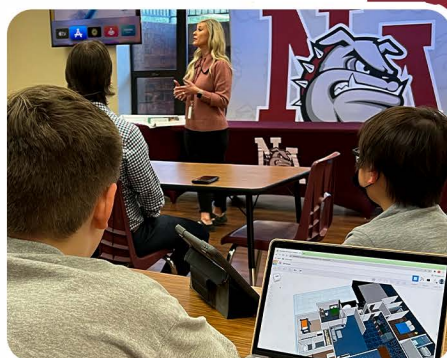

The goals of our district can be easily applied to our Apple Journey:

Increase student achievement through engagement and exciting hands-on, project based learning where creativity and innovation are encouraged.

Ensure continuous instructional improvements through rigorous curricula, engaging instruction, focused assessments, and technological advancements.

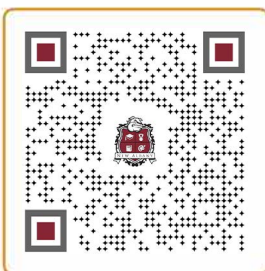

Provide equity in educational excellence by increasing participation for all students in Apple technology enhanced learning environments.

Prepare all students to be college and career ready through the utilization of educational apps, learning management systems, and industry standard technology by leveraging all of the available Apple products.

LEARNING

The learning environment at New Albany Middle School has been transformed through the use of Apple technology. All of our students have iPad devices for their instructional needs. Students are able to perform tasks, complete assignments, create and complete projects, take state and local assessments, all through the iPad and the many apps available. Our teachers have iPad devices, MacBook Pros, and Apple TVs in their classrooms providing them with an amazing learning platform to instruct their students. Teachers engage students by using the Apple technology provided to enrich the educational experience for their students. The technology also enables teachers to collect, grade, and monitor a students' performance quickly and efficiently. This timely feedback, enhanced by Apple technology, allows teachers the opportunity to accelerate the learning curve of their students.

Classroom | 1:1 AppleTV

Professional Services

- 100% of Teachers are Apple Certified Teachers
- 85% of Office Staff are Apple Certified Teachers
- 2 District shared Apple Learning Coaches

TODAY

New Albany Middle School is a high performing middle school that serves a diverse student population in grades 6-8. We began our Apple journey four years ago. During that time there has been positive change that includes a STEAM lab. The **"Imagine Lab"** is an innovative, State-of-the art modern lab that encourages a hands-on approach to learning and allows students the opportunity to acquire skills in the **career sectors** that are important to our region. The implementation of the lab, as well as the expansion of the fine arts programs and moving high school credits down to NAMS, have created a positive culture in our school where students are eager to learn and challenged to be innovative.

SUCCESS

New Albany Middle School has invested in Apple technology for all of our students and teachers. It has provided opportunities for communication, collaboration, and enrichment to the learning environment. Apple Technology has enhanced all of our day to day learning experiences. The walls of the classroom seemingly don't exist anymore because Apple technology allows our students new ways of learning, communicating, working collaboratively, and problem solving. Changes like these have increased engagement in the classroom at New Albany Middle School, improving achievement in the state's accountability rating of our school.

WHAT'S NEXT?

As New Albany Middle School advances into the future, we will utilize Apple technology as an avenue for fostering academic success. Teachers and administrators are invested in the concept that technology in the classroom cultivates student ideas and brings them to life in the real world through the use of digital tools.

Distinguished School

Our Goals

- Increase the usage of Procreate from 25% to 50%
- Expand the "Imagine STEAM Lab" to include metal design and fabrication
- Implement app development to 30% using SWIFT and X Code
- Facilitate Project Based Learning from 15% to 30% with fidelity
- Add one Apple Learning Coach per year

Teachers will develop and implement cross-curricular lessons with engaging Apple technology tools to ignite creativity and propel careers with endless solutions.
